Web	HTML5, CSS3, JavaScript, React JS
Tools	Git, GitHub, Figma, VS Code
Core Java	OOP, Collections, Exception Handling, Multithreading, File Handling, Arrays, Strings

PROFESSIONAL EXPERIENCE

Team Leader — Web Development | Logic Point Infotech | January 2025 – June 2025

• Led and managed a development team of 10 developers, assigning tasks according to individual strengths and tracking delivery.

• Contributed to software projects involving frontend development, databases, Firebase and Git/GitHub.

PROJECTS

Cab Booking System — Android Application

• Developed a native Android application for a tours and travel company using Java and Kotlin.

• Implemented login and registration with Firebase Authentication, car booking, customer management, user profile and booking history.

• Developed an admin dashboard and integrated Cloud Firestore for application data storage and retrieval.

• Designed the mobile UI/UX using Figma.

Technologies: Java, Kotlin, Android Studio, Firebase Authentication, Cloud Firestore, Figma, Git.

Bappa Tours & Travels — Booking Website

• Developed a full-stack car rental and booking platform with booking, fleet management, customer feedback, admin/user management and automated bill generation.

Technologies: React JS, PHP, MySQL, Firebase, HTML, CSS, JavaScript.

Smart Financial Expense Analysis

• Developed a financial expense management application using Java 21 and Spring Boot with expense, category, budget, dashboard, analytics and reporting functionality.
